Creating L2TP/IPSec VPN with helper utility

We have developed an utility which will help you to create L2TP/IPSec VPN connections instead of manual configuration.

You can get it from <u>here</u>.

- Identity Cloaker Username / Password: Please use the same credentials as for your Member area and Identity Cloaker application. If you don't remember then you can reset it <u>here</u>
- Verify user online before creating VPN: This will check your user Identity Cloaaker account online so created VPNs will be using the right credentilas. It is possible to disable this option if the application is not able to communicate with our main server (error displayed).
- Check boxes for VPNs you want to create. This connections will apper at Control Panel->Network and Internet->Network and Sharing Center->Change adapter settings

You can now find newly created VPNs at Control Panel->Network and Internet->Network and Sharing Center->Change adapter settings . It is possible to connect with a righ click on the selected VPN.

Connecting dialog follows.

Seconnect UK14						
<u>U</u> ser name:	munzap1					
Password:	[To change the saved password, click here]					
Do <u>m</u> ain:						
✓ Save this user name and password for the following users:						
Me o <u>n</u> ly Me only						
Connect	Cancel Properties <u>H</u> elp					

Press "Connect" button to connect

Now the connection attempt will follow.

If you see this screen after succeful connection then please click Home Network

To verify your new IP please check this <u>page</u>. Now the IP should be different to the IP before VPN activation.

You can disconnect his way:

PC - Windows
